

Continuity of Care

Better for you, better care

At Foundry Clinic, we believe that seeing the same clinician who knows you and your medical history makes a real difference.

Seeing the same clinician, who knows you, makes a big difference.

WHY CONTINUITY MATTERS

Better outcomes

Clinicians who know you can spot changes sooner and manage your health more effectively.

Stronger relationships

You feel listened to, understood and more involved in decisions about your care.

Safer, more personal care

A complete understanding of your history helps reduce errors and unnecessary tests.

More efficient

Less time repeating information and more time focusing on what matters most to you.

WHAT WE'RE DOING

We are working hard to improve continuity for our patients:

- ✓ We are identifying patients who would benefit most from seeing a usual GP or ANP.
- ✓ We are reviewing our booking and triage systems to support more continuity wherever possible.
- ✓ We are encouraging our team to help you see your usual clinician when booking appointments.
- ✓ We are monitoring our progress and always looking for ways to do better.

WHAT THIS MEANS FOR YOU

You may sometimes be offered a slightly longer wait to see your usual GP or ANP.

We believe that for many patients, this extra wait is worth it for the better care and understanding you receive.

Of course, if you need urgent help, we will always make sure you are seen as quickly as possible.

We're here for your health – today, tomorrow and for the long term.
Thank you for supporting continuity of care at Foundry Clinic.

If you have any questions, please speak to a member of our team.
